DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-52 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Abutted-pin hierarchical physical design is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Page 17 of the application clearly teaches the abutted-pin hierarchical physical design providing solutions to the problems of the traditional hierarchical physical design and providing additional advantages and benefits. This feature considered essential by the applicant is not reflected in the claims 1, 15, 29 and 41 which are rejected.

Claims 2-14, 16-28, 30-40 and 42-52 are necessarily rejected since these claims directly or indirectly depend upon the rejected base claims.
